

E6000P

Description

E6000P AN Emex™ Heavy ANFO Blend is extensively used in surface, opencast and quarry applications (the premier product is used for very difficult / extremely hard conditions). E6000P Heavy ANFO blend is prepared by mixing Matrix™ with Expan™ 100. Heavy ANFO blends (AN Emex™) are prepared by blending Matrix™ (65%) with Expan™ (35%). All bulk explosive products are delivered down-the-hole using state of the art bulk delivery trucks (MMU's -Mobile Manufacturing Units).
