

EZ Det®

Description

The EZ Det® non-electric blast initiation system is precise, reliable and millisecond accurate, used in open pit mining, quarries and construction. The system is commonly used in 'air blast' sensitive areas as it is considered 'noiseless'. The EZ Det® system can be used with various timing combinations to provide precise, reliable and millisecond accurate sequential blasting, in addition to a fast, simple and cost effective hook-up while allowing an unlimited number of holes to be shot with inherent sequential timing.
