

MS Primadet® - millisecond series

Description

MS Primadet® series detonators are used as downlines in opencast mining and quarry operations where 'point initiation' is desired down the hole. The unit consists of a precise detonator assembled on a sealed length of shock tube with a J-hook at the other end. The MS Primadet® system provide precise, reliable and millisecond accurate sequential blasting, in addition to a fast, simple and cost effective hook-up while allowing an unlimited number of holes to be shot with inherent sequential timing.
