

Noiseless Trunkline Delays (NTD)

Description

The Primadet® Noiseless Trunkline Delay (NTD) non-electric delay detonator products are used in surface applications as surface delays with detonating cord and / or shock tube downlines. The system is commonly used in 'air blast' sensitive areas as it is considered 'noiseless'. The Noiseless Trunkline Delay (NTD) system have various timings to provide precise, reliable and millisecond accurate sequential blasting, in addition to a fast, simple and cost effective hook-up while allowing an unlimited number of holes to be shot with inherent sequential timing.
